METHOD AND SYSTEM USING RETURN LABELS WITH DYNAMICALLY GENERATED MULTIPLE DATAPOINT CODING

ABSTRACT OF THE DISCLOSURE

A method of providing returnable customer items, originally purchased from a merchant. The merchant provides the customer with a special returns label that
5   permits the customer to drop the return package with a carrier without paying shipping charges to the carrier. The label includes an integrated machine readable code, which permits a returns center to easily assess shipping charges and perform other services related to the return.
